

PRESS RELEASE

## ETL Group Company Profile

The ETL Group is represented by more than 870 firms in Germany, plus an additional 250 offices in 50 countries across the world within the ETL GLOBAL network. ETL is the market leader in tax consultancy and among the top five audit and tax advisory companies in Germany. Specialising in tax consultancy, audit, legal advisory, management consultancy and IT, the group generates a domestic turnover of over 950 million euros. Our 7,400 professionals include more than 1,500 certified tax consultants, lawyers and auditors. In total, over 10,000 employees support upwards of 200,000 clients across Germany. An interdisciplinary consulting approach and diverse industry specializations make ETL the ideal partner for companies, freelancers and self-employed people in all sectors.

In 1971, Franz-Josef Wernze started EKW-Treuhand GmbH, laying the foundation for what the ETL Group has become today. Since 1995, the ETL Group has brought together tax consultants, lawyers, auditors, management consultants and financial service providers under one umbrella.

Belonging to the ETL Group allows individual firms to work more efficiently than smaller competitors who lack this mutual support. With “Competencies that complement each other”, clients benefit from a complete service from start to finish. Account managers can draw on the expert knowledge of partners in the areas of tax, law, auditing, management consulting and finance whenever needed. From small business owners and freelancers to internationally positioned medium-sized companies - ETL firms are always committed to the companies in their region, valuing proximity to their clients.

### **Sector solutions for particular industries and stakeholder groups**

Specific sector solutions meet the particular requirements of different stakeholders and industries (such as healthcare, hotels and restaurants, filling stations, senior citizens, professional athletes, agriculture and forestry, as well as franchise systems and e-commerce). They underline the company’s innovative power and market knowledge. Today, the ETL Group is the market leader for both filling stations and the outpatient health sector.
